

SIMPLE PROJECTS. SMART SOLUTIONS.

Academic Project Portfolio & System Blueprints

From Idea to Implementation, We Build Intelligent Academic Solutions. Next-generation web portals, machine learning algorithms, and IoT prototypes built with clean, premium codebases.

WHAT WE DO

- ✓ Full Syllabus-Compliant Codebase Designs
- ✓ Complete Project Thesis Reports (Syllabus-aligned)
- ✓ Full PowerPoint (PPT) Presentation Slides
- ✓ 1-on-1 Zoom Code Setup & Viva Guidance

Why Students Trust Shubdeep Labs

We supply top-grade code resources alongside explanation tools to help you verify logic.

100% Original Work

No copy-pasted templates. Every codebase is structured freshly according to your specific college needs.

On-Time Delivery

We are extremely strict with dates. Get your complete setup, reports, and slides well before your final submit day.

PPT & Reports Ready

Syllabus-compliant, fully formatted presentation drafts and comprehensive project reports included.

Clean Documented Code

Neat model structures, clean controllers, and comprehensive code comments that make logic review easy.

Academic Study Areas & Syllabus Levels

We customize project directories to comply exactly with your review parameters.

Diploma Projects

Syllabus-compliant, core-logic driven applications scaled perfectly for diploma review parameters.

Engineering Projects

Full-stack architectures, neat database structures, and comprehensive data flows built for B.E. / B.Tech.

M.Tech Projects

High-grade algorithm modeling, data analysis, and advanced codebase executions for research thesis.

BCA / MCA Projects

Interactive management portals, dashboard consoles, cloud databases, and clean system layouts.

AI / ML Projects

TensorFlow / PyTorch models, visual scans, NLP conversational bots, and predictive analytics pipelines.

Web Projects

Stunning responsive portals, custom dashboards, single page interfaces, and rich administrative panels.

Academic System Blueprints

Explore pre-configured logic outlines. We establish secure databases and layouts.

AI Plant Disease Detector

Verified Stack

TECH SPECIFICATION:

Python, Next.js, TensorFlow, FastAPI

A neural-network visual scanning web application detecting agricultural leaf diseases with detailed metric analytics. Auto-generates diagnostic summary grids.

Advanced AI Customer Care Chatbot

Verified Stack

TECH SPECIFICATION:

React, Node.js, Express, OpenAI API

Intelligent messaging center with customizable document indexing (RAG) and interactive dashboard console log views. Complete with user session logging database.

Face Recognition Attendance system

Verified Stack

TECH SPECIFICATION:

Python, OpenCV, Tkinter, SQLite

Real-time face detection tracker featuring automated CSV sheets generation and attendance log exports. Designed for high accuracy review parameters.

Academic System Blueprints (Contd.)

Explore pre-configured logic outlines. We establish secure databases and layouts.

Hospital Management Core Desk

Verified Stack

TECH SPECIFICATION:

Next.js, MongoDB, Tailwind, Node.js

Full clinic portal with scheduling grids, active invoice trackers, and secure digital prescription vaults. Styled with a premium dark-mode interface dashboard.

Expense Tracker with AI Insights

Verified Stack

TECH SPECIFICATION:

React, Node.js, MongoDB, Gemini API

Personal finance portal offering automated category tagging, monthly budget forecasting, and AI-driven spending recommendations with beautiful chart summaries.

Smart Notes Summarizer

Verified Stack

TECH SPECIFICATION:

React, FastAPI, Python, Hugging Face

Collaborative document pad that auto-generates structured summaries, highlights action items, and generates flashcards using NLP algorithms.

Costing & Student Stories

Transparent starting reference and verified reviews from diploma & degree final years.

Academic Project Pricing

 Diploma Projects	Free 	 Engineering Projects	₹3,999+
 BCA / MCA Projects	₹2,999+	 Web Development	₹3,999+
 Android Projects	₹4,999+	 IoT Projects	₹4,999+

Verified Student Testimonials

"Excellent research algorithm modeling! The Shubdeep Labs team helped me build the GreenMind AI plant disease detector app for my M.Tech thesis. The codebase was clean and well-documented. Got full support during reviews."

Miss Yelgonde
M.Tech Student

"Highly professional service. They custom-tailored the Agrovision machine learning model and backend integration for my project. The detailed thesis report and presentation slides saved me months of revision."

Miss Pogul
M.Tech Student

"Amazing explanation and Zoom support! They built a beautiful e-commerce website for my business, helped configure the database, and explained the administration panels perfectly. Strongly recommended!"

Miss Saina
Client

Discuss Your Scope with Our Desk

Connect directly to clarify details, branch requirements, deadlines, or to custom design modules for your college viva reviewers.
